

CABBS OPTIMIST DINGHY PLAN ORDER FORM

The Cleveland Amateur Boatbuilding and Boating Society drew this plan for the purposes of their WHISTLE Youth Sailboat Program. Members used a 1950's era boating magazine article to develop the dimensional and construction data. We believe the plans perpetuate the Optimist dinghy designer Clark Mills' ideal to offer youth a sailboat they could build.

This CABBS Optimist will not meet the measurement requirements for competition as stipulated by the International Optimist Association. However, it does provide the same sail training platform as an International Optimist at a much lower cost and can be built by anyone with a minimum of hand tools and wood working skills.

If you have an questions about the plans e-mail us at: cabbsmail@gmail.com.
